

It does not surprise me that the FCC is using September 11 and the subsequent war to mask its' moves to allow media conglomerates to dominate all levels of information distribution. As an informed voter I would like to inform the individuals in the FCC that your actions wrong the public. In addition, while it may seem that all eyes are focused elsewhere, that assumption is false. The purpose of the media in any form is to distribute information. To consolodate this distribution under one roof will put at risk this nations most cherished right of free speech. The FCC is tasked with ensuring free speech and in this case they are endangering it. Do not change the ownership rules.
